DUO EQUINE

THE FIRST AND ONLY EPA DESIGN FOR THE ENVIRONMENT (DfE) APPROVED EQUINE PRODUCTS.

Duo Equine™ products use a revolutionary technology that is not only safer for you and your horses, but that also powerfully cleans, remediates and repels dirt, grease, grime and odor. Finally, an effective and safe way to clean and control the odors that attract flies and insects.

THE HAZARDOUS PRODUCTS CURRENTLY USED ARE NOT WORTH THE RISK AND CAN MAKE PROBLEMS WORSE.

Duo Equine products were the first equine products recognized for safer chemistry by the Environmental Protection Agency under the Design for the Environment (DfE) program. This means they are safer for people, animals and the environment. The products were found worthy of recognition after passing a rigorous third party toxicology review and an EPA scientific review.

Duo Equine™

STALL ODOR PROBLEMS TODAY

Horses today are spending more time in stalls. Therefore, the build-up of ammonia and mercaptans in urine and feces are causing severe odor problems for horses, people and nearby residents. Over time, the build-up of odor causing agents can contribute to unhealthy air in and around horse barns and equestrian facilities. For horses, low levels of ammonia not only create odor, but can also contribute to the following equine problems: airway distress, increased rate of pneumonia, lower weight gain, damage to the respiratory tract and eye and skin disease. For humans, repeated exposure to ammonia and toxins can contribute to respiratory disease, heart disease, cancer and neurological disorders.

WHAT MAKES Duo Equine™ DIFFERENT

Duo Equine products feature revolutionary technology that is proven EFFECTIVE and SAFE. Unlike other equine odor and cleaning products, Duo Equine products:

- Have the EPA's Design for the Environment (DfE) Designation
- Have Zero Volatile Organic Compounds (VOCs)
- Improve Air Quality in Barns and Equestrian Facilities
- Are FREE from Toxins and Harsh Chemicals
- Are Rapidly Biodegradable
- Are FREE from Allergens, Dyes, Perfumes, Oils, Scents and Other Fragrances
- Are Non-Hazardous and Can Be Discharged into the Sanitary Sewer or Septic System
- Are Manufactured with Sustainable Resources in a Zero Discharge Facility

Duo Equine™

The DUO Answer

Use Duo Equine Odor Eliminator and Fly Repellent to clean and eliminate dirt, grease, grime and odor in barns and equestrian facilities. Duo Equine does not contain soaps, oils, perfumes, masking agents, pyrethrins, PPO or other “normal” ingredients. Duo Equine products are designed to provide more effective and longer lasting cleaning with safer chemistry. Our carefully curated formula safely changes the chemical compound of the odor causing molecule, when applied directly to the odor source. This in turn will deter and repel the attraction of flies, making a happier horse, and a happier you!

Safe for use on:

- Stalls
- Trailers
- Tack
- Rubber
- Plastic
- Metal
- Wood
- Fabric
- Manure Piles
- Farm Equipment
- Concrete
- Drains and many other areas!

Duo Equine™

Why you should Duo

Duo SAVES TIME

Dealing with dust, odor and pollution issues can be time consuming. Duo Equine products are easily applied and are long lasting.

Duo SAVES MONEY

Duo Equine products provide a healthier environment for humans and horses. Duo Equine products reduce the risk of health related problems associated with exposure to toxins for both horses and humans therefore reducing the risk of illness and death. Duo Equine products can also be used in many areas of the barn and equestrian facility eliminating the need for multiple products. Additionally, many equestrian facilities are threatened by regulation and neighbor complaints because of odor. Duo Equine products can mean the difference between ongoing troubles and peaceful operations, and can reduce the risk of nuisance lawsuits, code violations and fines.

Duo REDUCES IMPACT

Duo Equine products are available in a variety of sizes and are available in ready-to-use or concentrated formulas. Packaging materials may be recycled. Duo Equine products are free from toxins and harsh chemicals and therefore can be safely washed down drains and stall shavings can be safely deposited into landfills without causing greater harm to the environment.

SAFER FOR YOU AND YOUR HORSES!

Duo Equine is FREE from toxins, perfumes, allergens, and other harsh chemicals and contains zero VOCs. Many odor eliminating and fly control products available on the market today contain pyrethrins and other harsh chemicals. Pyrethrins can be quite harmful to both horses and the humans that come in contact with them. Duo Equine products appear odorless and colorless yet are more effective and longer lasting than traditional and “green” products on the market today. *The True Smell of Clean is No Smell at All™.*
